

Nº n/n	The direction of research project	Name of the project	Project manager	Period	Contacts
1	Energy and Mechanical Engineering	Formation and stabilization of efficient thin-layer perovskite solar cells with a heterojunction invert structure	Taurbaev T.I.	2018-2020	<a href="mailto:taur@physics.kz">taur@physics.kz</a>
2	Energy and Mechanical Engineering	Development of technological basis for the separation of gas mixtures from modular flow-through devices in the context of energy efficiency and environmental impact	Kosov V.N.	2018-2020	<a href="mailto:kosov_vlad_nik@list.ru">kosov_vlad_nik@list.ru</a>
3	Energy and Mechanical Engineering	Complex processing of solid fuels to produce energy-accumulating substances and energy gas	Ustimenko A.B.	2018-2020	<a href="mailto:ust@physics.kz">ust@physics.kz</a>
4	Energy and Mechanical Engineering	Long-term high-temperature testing of HTGR core materials	Chikhray E.V.	2018-2020	<a href="mailto:chikhray@physics.kz">chikhray@physics.kz</a>
5	Energy and Mechanical Engineering	Introduction of OFA-Technology (technology of "acute" blast) with the aim of minimizing harm and gas-dust emissions from Shakhtar TPPs using high-grade coal	Askarova A.S.	2018-2020	<a href="mailto:Aliya.Askarova@kaznu.kz">Aliya.Askarova@kaznu.kz</a>
6	Energy and Mechanical Engineering	Influence of radiation and heat loads on intracamerical materials and dust formation in the presence of a plasma cord in a nuclear fusion energy reactor	Ramazanov T.S.	2018-2020	<a href="mailto:ramazan@physics.kz">ramazan@physics.kz</a>
7	Information, telecommunication and space technologies, research in the natural sciences	Special modes and the emergence of space-timeconvective formations of diffusion in multicomponent gas mixtures	Kosov V.N., Mukhamedenkyzy V.	2018-2020	<a href="mailto:kosov_vlad_nik@list.ru">kosov_vlad_nik@list.ru</a>
8	Information, telecommunication and space technologies, research in the natural sciences	Investigation of radiation capture and peripheral nuclear reactions of proton transfer to energies near the Coulomb barrier caused by heavy ions for astrophysical and thermonuclear applications	Burtebaev N.	2018-2020	<a href="mailto:burteb@inp.kz">burteb@inp.kz</a>
9	Information, telecommunication and space technologies, research in the natural sciences	Investigation of the structure of partially collective states of atomic nuclei, based on the microscope-fermion theory and its application to real multi-nucleon systems	Baktybaev K.	2018-2020	<a href="mailto:zhkulyana@mail.ru">zhkulyana@mail.ru</a>

10	Information, telecommunication and space technologies, research in the natural sciences	Direct determination of the dynamic properties of non-ideal plasma	Arkhipov Yu.V.	2018-2020	<a href="mailto:Yuriy.Arkhipov@kaznu.kz">Yuriy.Arkhipov@kaznu.kz</a>
11	Information, telecommunication and space technologies, research in the natural sciences	Investigations of excited states of light nuclei	N.Takibaev	2018-2020	<a href="mailto:takibayev@gmail.com">takibayev@gmail.com</a>
12	Information, telecommunication and space technologies, research in the natural sciences	Study of dust-sound solitons in a magnetoactive plasma of complex composition	Dzhumagulova K.	2018-2020	<a href="mailto:dzhumagulova.karlygash@gmail.com">dzhumagulova.karlygash@gmail.com</a>
13	Information, telecommunication and space technologies, research in the natural sciences	Chemical model of dusty plasma	Davletov A.E.	2018-2020	<a href="mailto:Askar.Davletov@kaznu.kz">Askar.Davletov@kaznu.kz</a>
14	Information, telecommunication and space technologies, research in the natural sciences	Cluster, multicluster inuklone degrees of freedom in light atomic nuclei	Zhusupov M.A.	2018-2020	<a href="mailto:zhkulyana@mail.ru">zhkulyana@mail.ru</a>
15	Information, telecommunication and space technologies, research in the natural sciences	Investigation of the properties of low-temperature complex plasma in an external magnetic field	Kodanova S.A.	2018-2020	<a href="mailto:kodanova@mail.ru">kodanova@mail.ru</a>
16	Information, telecommunication and space technologies, research in the natural sciences	Investigation of the fundamental properties of a nonideal complex plasma based on particle interaction models	Ramazanov T.S.	2018-2020	<a href="mailto:ramazan@physics.kz">ramazan@physics.kz</a>
17	Information, telecommunication and space technologies, research in the natural sciences	Numerical study of the dynamics of test bodies in the field of extended bodies with an internal structure in GR	Abishev M.E.	2018-2020	<a href="mailto:abishevme@mail.ru">abishevme@mail.ru</a>
18	Information, telecommunication and space technologies, research in the natural sciences	Creation of new computer technologies for 3D modeling of heat and mass transfer processes in high-temperature physicochemical-reactive environments	Askarova A.S.	2018-2020	<a href="mailto:Aliya.Askarova@kaznu.kz">Aliya.Askarova@kaznu.kz</a>
1	Energy and Mechanical Engineering	Plasma technology for production of syngas for power generation from carbon-containing waste (CCW).	Ustimenko A.B.	2015-2017	<a href="mailto:ust@physics.kz">ust@physics.kz</a>
2	Energy and Mechanical Engineering	Development of fast neutron detectors based on high-purity VPE GaAs epitaxial layers and study their characteristics	Burtebaev N.	2015-2017	<a href="mailto:burteb@inp.kz">burteb@inp.kz</a>

3	Energy and Mechanical Engineering	Studying of formation of chemically active gases at accidents on high-temperature gas-cooled reactor (HTGR)	Shestakov V.P.	2015-2017	<a href="mailto:chikhray@physics.kz">chikhray@physics.kz</a>
4	Energy and Mechanical Engineering	Elementary processes and optical properties of the complex plasma of inertial confinement fusion	Dzhumagulova K.N.	2015-2017	<a href="mailto:dzhumagulova.karlyqash@gmail.com">dzhumagulova.karlyqash@gmail.com</a>
5	Energy and Mechanical Engineering	Influence of dust formation and properties of the edge plasma with dust particles on operation regimes of thermonuclear fusion power reactors	Ramazanov T.S.	2015-2017	<a href="mailto:ramazan@physics.kz">ramazan@physics.kz</a>
6	Energy and Mechanical Engineering	Theoretical and experimental study of formation processes of methane clathrate hydrates in the condensed water environment at low temperatures	Drobyshev A.S.	2015-2017	<a href="mailto:Andrei.Drobyshev@kaznu.kz">Andrei.Drobyshev@kaznu.kz</a>
7	Energy and Mechanical Engineering	Creation of the independent 1 kW peak power cascade solar generator of thermal and electric energy	Lavrishchev O.A.	2015-2017	<a href="mailto:lavr@physics.kz">lavr@physics.kz</a>
8	Energy and Mechanical Engineering	Development of device for separating the hydrocarbon gas mixture into components with specified properties by convective diffusion method	Kosov V.N.	2015-2017	<a href="mailto:kosov_vlad_nik@list.ru">kosov_vlad_nik@list.ru</a>
9	Energy and Mechanical Engineering	Development of energy saving technologies for efficient and cleaner burning low-grade coal in the Kazakh energy boilers of TPP	Askarova A.S.	2015-2017	<a href="mailto:Aliya.Askarova@kaznu.kz">Aliya.Askarova@kaznu.kz</a>
10	Energy and Mechanical Engineering	Preparation and Investigation of Novel Highly Efficient Solar Cells based on Organometal Perovskites	Turbayev T.I.	2012-2014	<a href="mailto:taur@physics.kz">taur@physics.kz</a>
11	Rational use of natural resources, processing of raw materials and products	Theme name of the project. Technology of production of superhard and protective coatings on structural materials.	Gabdullina A.T.	2015-2017	<a href="mailto:a_gabdullina@mail.ru">a_gabdullina@mail.ru</a>
12	Rational use of natural resources, processing of raw materials and products	The development of the technology of obtaining multi-purpose nanocarbon materials and composites	Chikhray E.V.	2015-2017	<a href="mailto:chikhray@physics.kz">chikhray@physics.kz</a>
13	Rational use of natural resources, processing of raw materials and products	Development of cost-effective technology for production of nanostructured composite coatings	Yar-Mukhamedova G.	2015-2017	<a href="mailto:gulmira-alma-ata@mail.ru">gulmira-alma-ata@mail.ru</a>

		chromed-white carbon with improved anticorrosion properties.		
14	Rational use of natural resources, processing of raw materials and products	Studying of soil moisture, water stock in the snow and ice ablation using neutrons and cosmic-ray muons	Oskomov V.V.	2015-2017 <a href="mailto:lvcl@mail.ru">lvcl@mail.ru</a>
15	Information and communication technologies	Design of wideband fractal antenna for UWB communication systems	Imanbayeva A.K.	2015-2017 <a href="mailto:akmaral@physics.kz">akmaral@physics.kz</a>
16	Information and communication technologies	Software development for the processing of experimental data and results of computer simulations based on modern mathematical methods	Askaruly A.	2015-2017 <a href="mailto:adil1_1@mail.ru">adil1_1@mail.ru</a>
17	Information and communication technologies	Development of informational-program package for modeling and visualization of dense plasma properties in inertial confinement fusion	Kodanova S.K.	2015-2017 <a href="mailto:kodanova@mail.ru">kodanova@mail.ru</a>
18	Information and communication technologies	Creating of neural networks with self-organizing electronic element	Zhanabaev Z.Zh.	2015-2017 <a href="mailto:sayataktanov@mail.ru">sayataktanov@mail.ru</a>
19	Information and communication technologies	Create an intelligent and robotic system for vacuum technological installation	Zhukeshov A.M.	2015-2017 <a href="mailto:zhukeshov@physics.kz">zhukeshov@physics.kz</a>
20	Information and communication technologies	Program-technical complex of data collection for scientific experiments, data collection	Oskomov V.V.	2015-2017 <a href="mailto:lvcl@mail.ru">lvcl@mail.ru</a>
21	Intellectual potential of the country	Motion of rotating extended bodies in gravitational fields	Abishev M.Ye.	2015-2017 <a href="mailto:abishevme@mail.ru">abishevme@mail.ru</a>
22	Intellectual potential of the country	Experimental studies and computer simulation of the spin conversion and spin-phonon interaction in thin films of methane cryocondensates	Drobyshev A.S.	2015-2017 <a href="mailto:Andrei.Drobyshev@kaznu.kz">Andrei.Drobyshev@kaznu.kz</a>
23	Intellectual potential of the country	Study of the nature and appearance of the halo-structure of the ground and excited states of light nuclei in nuclear processes	Zhusupov M.A.	2015-2017 <a href="mailto:zhkulyana@mail.ru">zhkulyana@mail.ru</a>
24	Intellectual potential of the country	Investigation of interaction of intermediate energy $\pi^\pm$ -mesons with neutron-rich 1p-shell nuclei in the framework of the Glauber diffraction theory	Imambekov O.	2015-2017 <a href="mailto:onlas@mail.ru">onlas@mail.ru</a>

25	Intellectual potential of the country	Research of heat transfer and heat exchange in complex streamflows	Isataev S.I.	2015-2017	<a href="mailto:Muhtar.Isataev@kaznu.kz">Muhtar.Isataev@kaznu.kz</a>
26	Intellectual potential of the country	Study of Nuclear Reactions and Processes in Stellar Matter	Takibayev N.Zh.	2015-2017	<a href="mailto:takibayev@gmail.com">takibayev@gmail.com</a>
27	Intellectual potential of the country	Investigation of dynamic and optical properties of dense Coulomb systems	Arkhipov Yu.V.	2015-2017	<a href="mailto:Yuriy.Arkhipov@kaznu.kz">Yuriy.Arkhipov@kaznu.kz</a>
28	Intellectual potential of the country	Self-consistent model of the static properties of dusty plasmas with particles of finite size	Davletov A.E.	2015-2017	<a href="mailto:Askar.Davletov@kaznu.kz">Askar.Davletov@kaznu.kz</a>
29	Intellectual potential of the country	Computer simulation of the properties of magnetized complex plasma	Dzhumagulova K.N.	2015-2017	<a href="mailto:dzhumagulova.karlygash@gmail.com">dzhumagulova.karlygash@gmail.com</a>
30	Intellectual potential of the country	The investigation of the simplest molecules to build precision optical molecular clocks operating in the terahertz and radio bands	Zhaugasheva S.A.	2015-2017	<a href="mailto:sazh_74@mail.ru">sazh_74@mail.ru</a>
31	Intellectual potential of the country	Interaction models and fundamental properties of non-ideal plasmas	Ramazanov T.S.	2015-2017	<a href="mailto:gabdullin@physics.kz">gabdullin@physics.kz</a>
32	Intellectual potential of the country	Development of motivation system of university teachers to innovate	Murzagaliyeva A.G.	2015-2017	<a href="mailto:altair.73@mail.ru">altair.73@mail.ru</a>
33	Intellectual potential of the country	Fundamental physical bases of controlling electric memory effect in nanodimensional chalcogenide semiconductors	Prikhod'ko O.Yu.	2015-2017	<a href="mailto:Oleg.Prikhodko@kaznu.kz">Oleg.Prikhodko@kaznu.kz</a>
34	Intellectual potential of the country	Investigation of white dwarfs taking into account temperature and rotation in general relativity	Boshkayev K.A.	2015-2017	<a href="mailto:kuantay@mail.ru">kuantay@mail.ru</a>
35	Intellectual potential of the country	A study of nonlinear effects in a cluster of self-oscillating systems	Medetov B.	2015-2017	<a href="mailto:bm02@mail.ru">bm02@mail.ru</a>
36	Intellectual potential of the country	Investigation of low temperature plasma properties for realization of micro and nano size dust particles manipulation	Kodanova S.K.	2015-2017	<a href="mailto:kodanova@mail.ru">kodanova@mail.ru</a>
37	Intellectual potential of the country	Multiquark states and their decays in the covariant quark model	Nurbakova G.	2015-2017	<a href="mailto:bekbaev-askhat@mail.ru">bekbaev-askhat@mail.ru</a>

38	Intellectual potential of the country	The study of the main characteristics of rare decays of baryons and properties of dibaryon systems	Nurbakova G.	2015-2018	<a href="mailto:bekbaev-askhat@mail.ru">bekbaev-askhat@mail.ru</a>
----	---------------------------------------	--	--------------	-----------	--

Nº	The direction of research project	Name of the project	Project manager	Period	Contacts
1	Energetics	Technology of synthesis of fullerenes and their hydrogenation for hydrogen storage.	Gabdullin M. T.	2013-2015	<a href="mailto:gabdullin@physics.kz">gabdullin@physics.kz</a>
2	Energetics	Development and research of stable silicon solar cells with efficiency of 16-17% with an oxide nanoporous silicon	Dihanbayev K.K.	2013-2015	<a href="mailto:dkadyrjan@mail.ru">dkadyrjan@mail.ru</a>
3	Energetics	Creation of technological foundations of heteroepitaxial carbon films in the presence of external fields.	Aliyev B.A.	2013-2015	<a href="mailto:aliyevb72@mail.ru">aliyevb72@mail.ru</a>
4	Life Science	MicroRNA expression in the regulation of genes involved in the development of lung cancer.	Ivashenko A.T.	2013-2015	<a href="mailto:a_ivashchenko@mail.ru">a_ivashchenko@mail.ru</a>
5	Intellectual potential of the country	Linear and nonlinear optical phenomena in ensembles of semiconductor nanocrystals	Taurbayev T.I.	2013-2015 гг.	<a href="mailto:taur@physics.kz">taur@physics.kz</a>
6	Intellectual potential of the country	Nonlinear phenomena in composite nanostructured metamaterials.	Davletov A.E.	2013-2015 гг.	<a href="mailto:askar.davletov@kaznu.kz">askar.davletov@kaznu.kz</a>
7	Information and communication technologies	Adaptation of algorithms of quantum computing to the analysis of multidimensional data and time series of different nature.	Kusainov A.S.	2013-2015 гг.	<a href="mailto:arman.kussainov@gmail.com">arman.kussainov@gmail.com</a>
8	International scientific and technical programs and projects for 2013-2015	Obtaining and hydrogen absorption of nanostructured materials for hydrogen	Gabdullin M. T.	2013-2015 гг.	<a href="mailto:gabdullin@physics.kz">gabdullin@physics.kz</a>

		accumulators and chemical power sources			
9	International scientific and technical programs and projects for 2013-2015	Investigation of physical and technological processes of formation of light-emitting structures on the basis of SiO <sub>2</sub> / Si with quantum dots of semiconductors A <sub>2</sub> B <sub>6</sub> for systems of optoelectronics	Togambayeva A.K.	2013-2015 гг.	<a href="mailto:altynay.togambayeva@kaznu.kz">altynay.togambayeva@kaznu.kz</a>
10	International scientific and technical programs and projects for 2013-2015	Obtaining and modification of nanostructured functional materials in plasma-dust environments	Ramazanov T. S.	2013-2015 гг.	<a href="mailto:ramazan@physics.kz">ramazan@physics.kz</a>
11	International scientific and technical programs and projects for 2013-2015	Investigation and research of new composite materials based on nanostructured polymers for micro and optoelectronics systems and protection against electromagnetic radiations	Kh.A. Abdullin	2013-2015 гг.	<a href="mailto:kh.a.abdullin@mail.ru">kh.a.abdullin@mail.ru</a>
