EQUIPMENT FOR PURCHASING "CLEAN COAL"

Our country is very rich in coal reserves and is a world leader in terms of coal production. According to some estimates, coal reserves are expected to reach 500 to 1,000 years, including current consumption levels. Therefore, the fact that today the share of coal energy has reached 85% is surprising.

"BLACK SOLDIER" WASTE-FREE TECHNOLOGY

Flies help solve environmental problems. The scientific name is *Nermetia illucens*, a fly larva popularly called the "black soldier". It not only turns organic waste into a natural, pure fertilizer, but is also indispensable in the creation of protein-rich compound feed. Today, in many countries of the world, the production of black worms, found in South America, is rapidly growing.
